Description:

Powerful tilting frying pan and cooking pan with **SPEED** high-performance heating with 2 frying zones and protection class IPX5

Execution:

Material: Chrome-nickel steel 18/10 DIN 1.4301

Detachable switch, inspection panel, rear panel and upper shelf in the substructure. Substructure in H2 design, closed on 3 sides, open at the front, cover at the rear 20 mm edged and with a flush connection system with hairline joint.

Can be built on a base by removing the feet.

Execution: Housing and cover made of several parts. Detachable switch and inspection panels. Curves and smooth surfaces enable optimal cleaning.

Roasting surface made of special steel, surface hard-plated stainless steel, the corners rounded, R12, with special grinding for a good non-stick effect and roasting results. Crucible with recess for hanging GN containers for cooking with the lid closed.

Water inlet via cover-operated swivel fitting

SPEED high-performance radiators ensure even heat distribution and a loss-free heating phase.

The simple operation is carried out by a stepless temperature control via thermostat with operating and heating display.

Roasting function with two separately adjustable heating zones

Cooking function only has one heating zone, the roasting function is deactivated here

Soft parboil setting, only one heating zone, with reduced power

Crucible with motor tilting and double-walled lid
